

WEAR PARTS AND CONSIGNMENT STOCK

For the long-term and uninterrupted operation of our equipment, we recommend that you only use replacement parts from SKAKO Vibration. Despite robust and sophisticated machine design, problems can never be completely ruled out.

Therefore, to ensure minimal downtime, you should always keep the most important parts readily available in your business.

This way our trained service personnel will be able quickly to help you.

We customize wear- and spare part kits, according to your requirements.

Be prepared, order a wear- spare part packed.

We recommend that you always have motors and controls repaired in our qualified and excellently equipped repair shop.

Our aftersales specialists can at any time provide you with a quote.
